The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ishii et al (US 5,838,717) discloses the spread spectrum system shown in figure 1. The description of the figure described the DS/utilizes separate code generators for generating a DS spread code and a FH spread code. Kisak (US 4,888,787) discloses a spread spectrum communication hybrid system that utilizes both direct sequence and frequency hopping (column 1, lines 26-38). The codes used in each portion of the hybrid system are related since they are used in the same transmitter but neither code is used in the generation of the other code.
